

LIS 600: Information in Society

Summer 2022

Instructor: Dr. Daniela Krueel DiGiacomo

Office Address: Lucile Little Fine Arts Library (3rd Floor) Room 353

Email: daniela.digiacom@uky.edu

Office hours: By appointment!

Overview

Official Course Description: Students investigate the information society and its relationships with our world including the impact on information organizations and communities. Students focus on the discipline's ethics, values, and core concepts. No prerequisites.

Course Norms: It will be my goal in this class to create a “community of learners” (Rogoff, 1994) amongst us—a generative space in which each of our “cultural repertoires of practice” (Gutiérrez & Rogoff, 2003)— is leveraged and integrated in equitable ways. Valuing each other's contributions and multiple ways of meaning-making and reflecting on one's own assumptions about what it means to learn and be a community member, are central aspects of creating a successful community of learners. Your ethical, respectful, and thoughtful critical thinking and participation in this joint project of learning is deeply important.

Because teaching is about learning, I will aim to extend materials iteratively based on your interests, experiences, and responses to what we are learning. For me, being responsive in the moment is what good and inclusive pedagogy is all about. Please get in touch with any questions about this norm, which reflects my own epistemological commitments to the co-construction of knowledge.

Contact Information: My preferred form of contact is email: daniela.digiacom@uky.edu. I am happy to meet with students (virtually or in person) during my office hours or by appointment

Schedule: Summer courses move fast! We have a total of 16 modules to cover, each spanning a few days during our 8 weeks together!

Course Objectives: Upon successful completion of this course, students can:

1. Explain the concepts of information society and information ecology and how these relate to specific information organizations.
2. Articulate the role of diverse information organizations within various communities.
3. Analyze various facets of a particular information ecology.
4. Apply the core values and ethics of the discipline as appropriate.
5. Communicate the function and value of information professionals.

Two Textbooks:

1. Hirsh, S. (Ed.) (2018). *Information services today: An introduction, 2nd edition*. Lanham, MD: Rowman & Littlefield. ISBN: 978-1-5381-0300-5. Note: Many readings come from this book; it is necessary to purchase it for this course. **Please be sure to purchase the second edition, as it differs considerably from the first edition.**

2. Klinenberg, E. (2019). *Palaces for the people: How social infrastructure can help fight inequality, polarization, and the decline of civic life*. Crown. ISBN: 978-1524761172. Note: Many readings come from this book; it is necessary to purchase it for this course. A used or ebook version is fine for this.

Academic Course Policies

All academic policies for the course can be found here:

<https://www.uky.edu/universitysenate/acadpolicy>.

Rules regarding academic offenses: <https://www.uky.edu/universitysenate/ao>.

Statement on Diversity, Equity, and Inclusion:

<https://www.uky.edu/universitysenate/syllabus-dei>

Resources available to students: <https://www.uky.edu/universitysenate/student-resources>.

Diversity: The School of Information Science defines diversity as “*embracing differences between people and promoting increased understanding regarding age, ethnicity, gender, marital status, military service, physical disabilities, race, religion, sexual orientation, socioeconomic condition, and thought with the purpose of creating an inclusive community.*” In this course, we address diversity in several ways. Part of the semester-long project incorporates a diversity-related goal. Readings which are especially relevant to the theme of diversity are marked with a ☒ symbol.

Technology: The School of Information Science emphasizes the importance and centrality of technology in today’s society. We must develop familiarity and comfort with an array of technology. In this course, we incorporate technology across multiple readings. Readings that are particularly relevant to the theme of technology are marked with a ☒ symbol.

Assignments and Grading

Reading. Completing the required reading each week is essential for doing well in the class. Most readings can be found through the UK Libraries, either as ebooks or through provided links; other readings will be made available online. Other material may also be required, such as slides, lectures, news articles, or videos. It is your responsibility to read/view this material as well. If you encounter a broken link or trouble accessing something, contact me.

Assignments. All assignments are due by 11:59 p.m. (Eastern time) on Saturday, unless otherwise noted. Assignments may be turned in early (though no extra credit is received for this). I will return graded assignments to you in a timely fashion. More details about each assignment can be found in the Assignments tab in the online environment. All assignments will be turned in online and returned to students online.

Participation:	25%
Self-reflection and introduction:	10%
Information ecology project:	55%
Final elevator speech:	10%

Participation: In this course, participation is measured by your contributions to the online discussions each week. **Each class member must contribute regularly (i.e., at least 3 postings) to each set of Discussion Board questions—the equivalent of a "B" grade for "participation."** (Note: this means at least three posts per module, not three posts for each question in each module.) Less participation will lower the grade; frequent, informed participation will raise it. In addition, consistently thoughtful contributions that advance discussion will receive more credit. Participation is worth 25% of your final grade. Due weekly.

Self-Reflection and Introduction: For this assignment, you will record a short video to introduce yourself and reflect on your purpose for this class and this academic program. You will also view and comment on others' videos. See the detailed assignment guide in Canvas.

Information Ecology Project: This project will contextualize what we learn about information ecology and apply it to a specific information organization. It is broken into multiple components. See the detailed assignment guide in Canvas. The information ecology project is worth a total of 55% of your final grade.

- Part A: Identify your information organization; (5% of total grade)
- Part B: Describe the organization's information ecology; (10% of total grade)
- Part C: Interview a MSLS-degree holder about ethics; (10% of total grade)
- Part D: Analyze a community engagement activity and the diversity of the community; (10% of final grade)
- Capstone: Summarize information ecosystem learning; (20% of final grade)

Elevator Speech: This will be a short, recorded audio and video presentation in which you make connections throughout the semester's readings and argue for the importance of our discipline/ profession. See the detailed assignment guide available in Canvas. The elevator speech is worth 10% of your final grade.

Grading. Grades are based on a percentage scale. There are 100 points available. Grading will not be done on a curve, but on a strict points basis. You can check your grade at any time or email me with any questions regarding grading. Late assignments will lose 10% for each day they are late. For example, if an assignment is worth 10 points, and it is one day late, you will lose 1 point. Exceptions will be granted in advance and in writing. **If you are going to turn in a late assignment, contact me as soon as possible to discuss the situation.** At the end of the course, I will convert the points earned into a percentage:

90% and above = A
80% to 90% = B
70% to 80% = C
below 70% = E
